This length is separate from the string length of your order

String starting point

This is the distance between the string starting point and the first sensor. The **minimum length is 10cm**

#1

This is the second distance. It is the distance between two sensors (measured from the middle of the first sensor casting to the middle of the following sensor casting) so its **minimum length is 15cm**.

#2

This is the third distance. It is the distance between the two subsequent sensors (measured from the middle of the second sensor casting to the middle of the following sensor casting) so its **minimum length is 15cm**.
