# USP Dongle Update

Version 3.xx of the USB Dongle solves some compatibility problems in with newer Windows versions and different radio frequencies. Newer Version of GP5W-Shell will show a warning, recommending the update, if an older dongle is found.
Update USB-Dongle to:

To update the USB-Dongles, follow this list:

Via Setup:

Click on „Update USB-Dongle Firmware..." to select the firmware file:

The correct firmware is depending on the used frequency and must correspondent to the used loggers or sensors!

Currently available are:

433 MHz and 868 MHz: For use in the EU only.
915 Mhz: For use in US/Canada only
(2.4 Ghz: Worldwide use, currently not used for products)

The Firmware file can be downloaded from:

Http://80.153.164.175/files.php
 -> firmware -> dongle_usb -> (select frequency)

Or (direct Link):

433 MHz:
Http://80.153.164.175/files/firmware/dongle_usb/433MHz_EU/dongle433_V3x00_20120505202511.bin

868 MHz:
Http://80.153.164.175/files/firmware/dongle_usb/868MHz_EU/dongle868_V3x00_20120505202350.bin

915 MHz:
Http://80.153.164.175/files/firmware/dongle_usb/915MHz_US/dongle915_V3x00_20120505202309.bin

After the Update, the Software should be restartet to recognise the new version!
